<ul style="list-style-type: none">● Energy saving practises in an office environment.● Low conductance glass.● Reflecting solar energy.	<p>This section looks at how offices can be designed and run to improve sustainability.</p>	<p>Office energy survey This survey can be completed by students on work experience, or students visiting an office as part of an exposure to work day.</p>	<p>This section should be looked at after students have learned about heat transfer mechanisms. Students could be set the task to find the difference between how this office aims to be more sustainable and how the secondary school could become more sustainable. It could also be explored as a contrast to how homes are being adapted to save energy.</p>
